first off i would like to express that i have been a XM use r for a while and to me its a real comfort to know that everywhere i go i get the same stations from coast to coast where as no radio staions can offer that and as far as the traffic reports go i find them rather useful when travelling so i dont havre to hunt for a station that is giving traffic reports it's already there! for the FCC and Government to pursue this venture is not only foolish but a complete waste of taxpayers money to pursue a service that is a paid service for people and is not free however let the government step in a help big business put screws in the small guy when the small guy starts making money .
